

SOUTH PARS

General Information:

The Iranian South Pars field is in the northern extension of Qatar's giant North Field. It covers an area of 500 square miles and is located 3,000m below the seabed at a water depth of 65m. The Iranian side accounts for 10% of the world's and 60% of Iran's total gas reserves. Iran's portion contains an estimated 436 trillion ft³.

Miscellaneous:

Structural weight	13.400 t
Water depth	60-70 m

Scope of Work:

The following work is carried out by Knud E. Hansen A/S (the former Marine-Technologies):

- Support to HVAC Project Management
- HVAC Commissioning
