Built by Galati facility of Damen, Romania (Yard No. 539305) for the Government of Newfoundland & Labrador, Canada. Delivered October 23, 2015. In service between Farewell-Fogo Island-Change Islands.

VETERAN, soon to be followed by LEGIONNAIRE, marks the start of a rejuvenation programme launched by the Government of Newfoundland and Labrador.

Built in Romania by the prolific Galați facility of Damen, the concept, tender and basic designs stems from the Knud E. Hansen stable who cooperated closely with the St. John's office of Fleetway.

VETERAN serves the route from Farewell on the northeast side of the main isle of Newfoundland to the smaller outer islands of Fogo Island and Change Islands having replaced the diminutive 1972-built CAPT. EARL W. WINSOR.

For the interior design, Damen teamed up with Design Triangle, a Burwell (Cambridge, UK) based studio that specialises in vehicle and component design for the transport industries with a focus on public transport. This has resulted in an utilitarian design that allows for easy maintenance and maximum ease of use. The colour palette of the furniture, fixtures and fittings reflects the ruggedly beautiful environment of the Fogo Island destination.

VETERAN is named in tribute to all individuals who have served in conflicts around the globe in general and the 1,076 soldiers of the Newfoundland Regiment who went ashore at Gallipoli, Turkey in September 1915 in particular.
