

110 m Adventure Wind Cruise Vessel

General:	The 110 m Adventure Wind Cruise Vessel is a sail-assisted cruise vessel that can accommodate up to 100 passengers and has a range of 6,000 nautical miles. This design is aimed at the adventure-cruise market and will appeal to passengers who prefer a more intimate cruise experience while visiting destinations that are inaccessible by larger ships. The design appeals to the growing eco-tourism segment that aims to travel the world while minimizing their carbon footprint. The combination of low-sulphur diesel and wind power result in a vessel that exceeds the requirements for Emission Control Areas and all forthcoming IMO regulations. The vessel also includes a large battery bank to allow for zero emissions in port as well as specially protected areas.	
Main Particulars:	Length oa	110.30 m
	Length pp	99.30 m
	Breadth moulded	17.00 m
	Depth moulded to deck 3	7.90 m
	Scantling draught	4.70 m
	Design draught	4.50 m
	Deadweight abt	730 t
Capacity:	Sail area abt	1,910 m ²
	Passenger cabins	50 pcs
Speed:	Service speed	15.00 kn
Scope of Work:	Concept Design Layout of Interior	
Ref. No.:	KEH 1788.04
