

125 m Expedition Cruise for One Ocean Expeditions

General:	The 125 m long expedition cruise is designed and constructed to be a modern passenger vessel. It is especially suited to operate in the heavy winds, the heavy seas and the narrow entrances and ports. The vessel is intended to be for world-wide operation and designed as a two-compartment vessel. The vessel features comfortable cabins of high standard for 182 passengers on four passenger decks.
